

Contracts

Capabilities

D&P concentrate solely on the provision of equipment and management services for Railway Rolling Stock Maintenance. The company has the capability, experience and commercial resources to execute projects in any manner required by its varied UK and International Clients.

Contracts are routinely executed in the following manner:

Turnkey Contractor D&P have extensive experience of performing major projects on a turnkey basis. In-house personnel have the technical know-how and capability to perform the entire process of design, procurement, testing, shipping, project management, installation, commissioning, training and warranty support on any major contract. D&P's experience, is truly International with 13 major projects completed since the mid-70's in locations as far apart as Caracas (Venezuela) and Taipei (Taiwan). Management Contractor

D&P are capable of acting as Managing Contractor for the selection, manufacture and installation of specialist Railway Maintenance Equipment. Design Studies

D&P's extensive experience of working on Railway Maintenance Facilities means that all areas of Workshop Design are capable of being handled by its personnel. This includes Workshop or Depot layouts and the design of specialist bespoke maintenance equipment. Depot/Workshop Upgrades and Rehabilitation

More and more Railway Maintenance projects are linked to the improvement of facilities for the introduction of new Rolling Stock or to introduce modern maintenance equipment and practices to reduce the downtime of existing Rolling Stock.

D&P's experience does not only relate to projects for 'new build' Depots and Workshops but extends to the upgrade and rehabilitation of existing facilities.
