

Adtranz (Sweden) - Adana Light Rail Project in Turkey

Adtranz (Sweden) are the Main Contractor for the Adana Light rail System in Turkey. Within this main contract Adtranz are responsible for the provision of the Railway Maintenance Facilities. In late 1997 Adtranz requested D&P to develop a concept Depot Design together with a Workshop layout, a detailed equipment list and equipment functional specifications. Following on from this study in 1999 D&P were awarded a contract for the supply of underfloor lifting equipment, mobile jacks, turntables and a Bogie Lifting and Turning Device. Please see web page Turnkey Contracts for details of this project.
