

Railtrack - Stewarts Lane Depot - Depot Upgrade

In 1998 Railtrack awarded D&P a contract to manage the upgrade of the Stewarts Lane Depot in London. The equipment upgraded included the following:

- CET Facility
- Carriage Washing Plant
- Compressed Air System
- Overhead Trolley System (Stinger)

The scope of work included management of the selection of suppliers, budget development, design, manufacture, installation, commissioning, testing and supply of Operation and Maintenance (O&M) Manuals.
