

## West Coast Traincare - Maintenance Shed at Oxley

D&P acted as Prime Contractor to construct a new Maintenance Facility at West Coast Traincare's Midlands Traincare Centre at Oxley. This one road maintenance shed incorporates a single car paint booth and a bogie drop table together with a maintenance pit. The facility was designed and constructed to take a nine car pendolino. The paint booth was transferred from Alstom's Washwood Heath facility following its closure and the bogie drop was transferred from Alstom's Asfordby test track site. D&P was responsible for the design of the facility together with the full Civil construction all E&M works and the dismantling and re-installation of the paint booth and bogie drop.
